

ANNOUNCEMENT
2009 GRADUATE STUDENT SUMMER FELLOWSHIPS

The Center for Applied Mathematics (CAM) is pleased to announce the Summer Fellowship competition for Graduate Students for the Summer of 2009. Each fellowship provides a stipend for the month of June. Support is only available for June 2009 since it comes out of the Center's 2008-2009 budget. Recipients will be designated as Graduate Summer Fellows of the Center for Applied Mathematics.

The Center's aim is to encourage interdisciplinary applied mathematics research at the University of Notre Dame. Established in August of 1987, CAM fosters University-wide interaction and collaboration and provides support for students and faculty researchers carrying out interdisciplinary applied mathematics research in a variety of disciplines spanning engineering, physical and social sciences and business. CAM provides graduate student fellowships, as well as running workshops and seminar series.

To apply for these fellowships for the Summer of 2009, a student must submit a proposal to the Center by Tuesday, April 14, 2009.

The proposal must describe clearly and concisely in no more than 2 pages the student's research topic; its relevance to applied mathematics; and its contribution to the present state-of-the-art in applied mathematics and their particular discipline. In particular, the proposal must state clearly:

- 1) what problems are being investigated (with appropriate references to the literature);
- 2) what progress you have made so far with some discussion of its significance; and
- 3) what you hope to achieve during the summer.

The proposal should be in no smaller than 11 point font; have 1 inch margins, and have no more than 6 lines per vertical inch.

The proposal should also contain the following:

- (i). A Curriculum Vitae of the applicant.
- (ii). A letter of recommendation from the student's faculty project advisor.

A student, who previously applied for a 2009-2010 CAM Graduate Fellowship, need only let us know they would like to be considered for a summer fellowship, and we will carry their application file forward into this competition. Students who received a 2009-2010 CAM Graduate Fellowship are not eligible for the summer stipend.

Final selection will be made by the Center's Executive Committee and will be announced in May.

Please submit proposals by April 14, 2009, to:
